Red Hat Overview

Modernize, Automate, and Accelerate with Confidence

Modernizing legacy systems, streamlining operations, and leveraging AI while maintaining security, compliance, and performance—these are the challenges IT leaders face every day. Tackling these demands requires innovative solutions that deliver real results. As a Red Hat Specialized Partner, we focus on helping you drive transformation, improve efficiency, and unlock the potential of your hybrid environments. From OpenShift virtualization and Kubernetes orchestration to containerization, AI/ML tooling, and Ansible-driven automation, our expertise empowers you to optimize workloads, rethink infrastructure, and scale innovation. Together, we help you turn your vision into action and stay ahead in an ever-changing digital landscape.

Modern Virtualization & Kubernetes

- OpenShift Virtualization Engine
  - ☐ Alternate Hypervisor & Day 2 Support Tools
  - ☐ Windows, Linux, & AIX VMs
  - ☐ Migrate to Modernize
- Containers & Kubernetes with OpenShift Container Platform
  - ☐ Microservice Design
  - ☐ Mobile Applications in a Hybrid Infrastructure
  - ☐ Ecosystem Tooling to Help with Managing Containerized Workloads on Day 2

Artificial Intelligence

- Leveraging AI to Enhance & Accelerate
- RHEL AI & OpenShift AI
  - ☐ Scale AI Workflows across Hybrid Environments
  - ☐ Compliant & Governed LLMs
  - ☐ Trusted AI/ML Tooling

IT Automation, Orchestration, & Management

- Automate Infrastructure, Cloud, and Applications
- Ansible Automation Platform
- Use Cases:
  - ☐ Provisioning & Patching
  - ☐ Configuration Management
  - ☐ Application Deployment
- Compute:
  - ☐ Infrastructure
  - ☐ Network
  - ☐ Applications
  - ☐ Cloud
  - ☐ Storage
