

# Deka ROCK: Redefining Efficiency in Enterprise Application Deployment

## Spend less time on infrastructure management, and more on growing your business

IT environments are becoming increasingly complex. Almost all (96%) of enterprises globally now rely on a hybrid cloud infrastructure, with a combination of on-premise, private and public cloud assets.<sup>1</sup> In many organisations, there's no consolidated infrastructure management or overarching insight.

This means updates are often reactive and piecemeal, making it easy for security or compliance gaps to surface. Scalability can also be a major problem—with most organisations unable to grow their infrastructure rapidly to cater for changes in the market or their organisation.

**PT Aplikanusa Lintasarta is  
a Ready Business Partner.**

## Discover a smarter, easier way to manage your IT infrastructure

Leveraging innovative Red Hat OpenShift container platform, Deka ROCK provides you with a highly scalable, manageable and easy to use infrastructure solution.

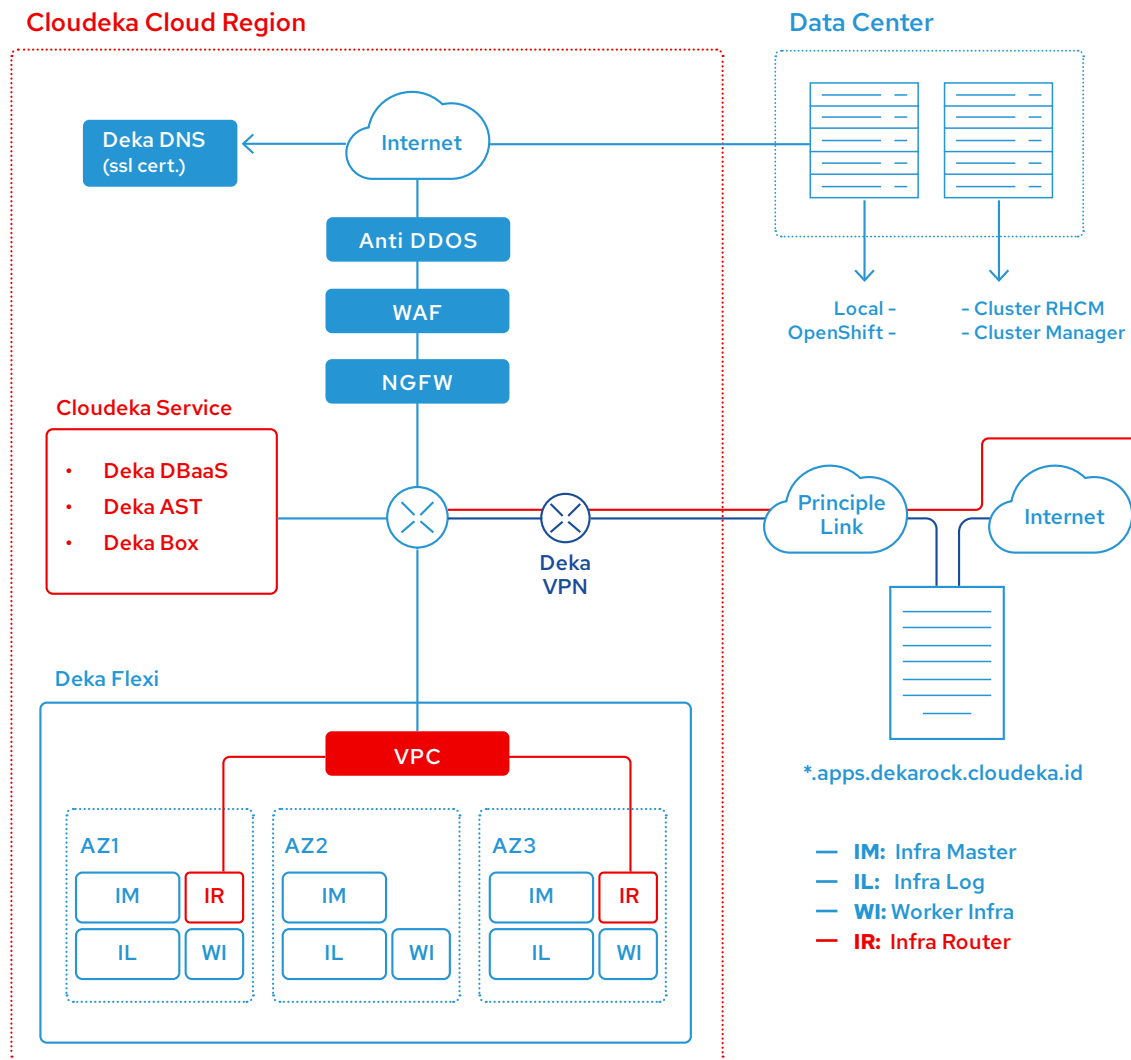

- **Get started quickly** – Deka ROCK can be deployed in less than an hour, depending on your configuration requirements.
- **Simplified, consistent management** – automated processes simplify overall management, and enable a consistent experience across public cloud, on-premise, hybrid cloud or edge architecture.
- **Scale quickly and easily** – increase or decrease the capacity of your infrastructure depending on your business' specific needs.
- **Increase your output** – with a well-managed and reliable infrastructure, your teams can build, modernise, and deploy applications at scale.
- **Save money** – save up to 50% on the network egress charges compared to a hyperscaler cloud option, with additional savings on RedHat OpenShift cluster implementation costs.
- **Easy to use** – control your infrastructure via a user-friendly portal which supports any requirement for infrastructure additions.

## Solution Time-to-Value for Customers

## Why partner with Cloudeka?

Cloudeka is a leading cloud solutions provider, owned by Lintasarta, one of Indonesia's biggest ICT companies with over 35 years' experience. Cloudeka delivers:

- **Robust cloud infrastructure** – spanning three regions in Indonesia, and matched with top-tier services.
- **Storage service** – which allows customers to secure persistent volume or object storage, and integrate it with OpenShift to maximise system functionality and efficiency.
- **Advanced security service** – from perimeter network security, including anti-DDoS and next-generation firewall (NGFW) on layer 3 and 4, to DevOps process integration, to application security and testing.

**PT Aplikanusa Lintasarta is  
a Ready Business Partner.**

- **Speed and performance** – our shared infrastructure supports internet connections up to 10 Gbps and we can also provide private network connectivity as required.
- **Complementary service** – we offer a wide range of additional solutions and services to help you get more out of your cloud infrastructure.
- **Cost saving** – we don't charge for network egress, are transparent about all costs, and offer a range of payment options depending on your needs.

The team here at Cloudeka recently implemented Deka ROCK and Red Hat OpenShift to effectively handle massive traffic demands for a leading oil and gas company. This business can now manage up to 10,000 concurrent connections per second, due to Cloudeka's server capacity and network strength.

An Indonesian government agency is also using Deka ROCK to provide online services to more than five million people across the country. The agency required a robust solution which could facilitate 30,000 concurrent connections. Our expert Cloudeka team helps the agency with ongoing management of its infrastructure, connectivity and security—halving its overall spend by eliminating network egress fees and providing an on-demand payment model.
