

Simplify the digitalisation of forms and processes across your organisation

Digitalizing forms and processes no longer needs to be a complex task

Today's customers expect to be able to do everything digitally – especially when it comes to completing forms or identity documents. Yet many organizations still rely on slow, paper-based processes for a range of transactions—negatively impacting both the customer and employee experience. Paper-based forms and documents can be inefficient, prone to error, and expose businesses to unnecessary security and compliance risks. Excess paper and printing costs can also affect an organization's environmental footprint.

Discover the smart, easy way to 'go digital'

UNIT Paperless is an innovative solution that combines business process automation (BPA) and smart form technology to help you rapidly digitalize transactions across your organization.

- **Evolves the customer experience** – provides your customers with a more seamless and contemporary digital interaction, without cumbersome form entry.
- **Improves efficiency** – eliminates the need to manually transfer data from paper-based forms into spreadsheets and databases, enabling staff to get the insights they need faster.
- **Enhances sustainability** – reduces the need for paper and printing resources and disposal.
- **Ensures compliance and security** – having digital systems enables you to adhere to data collection and storage requirements, and effectively mitigate the risk of a security breach.

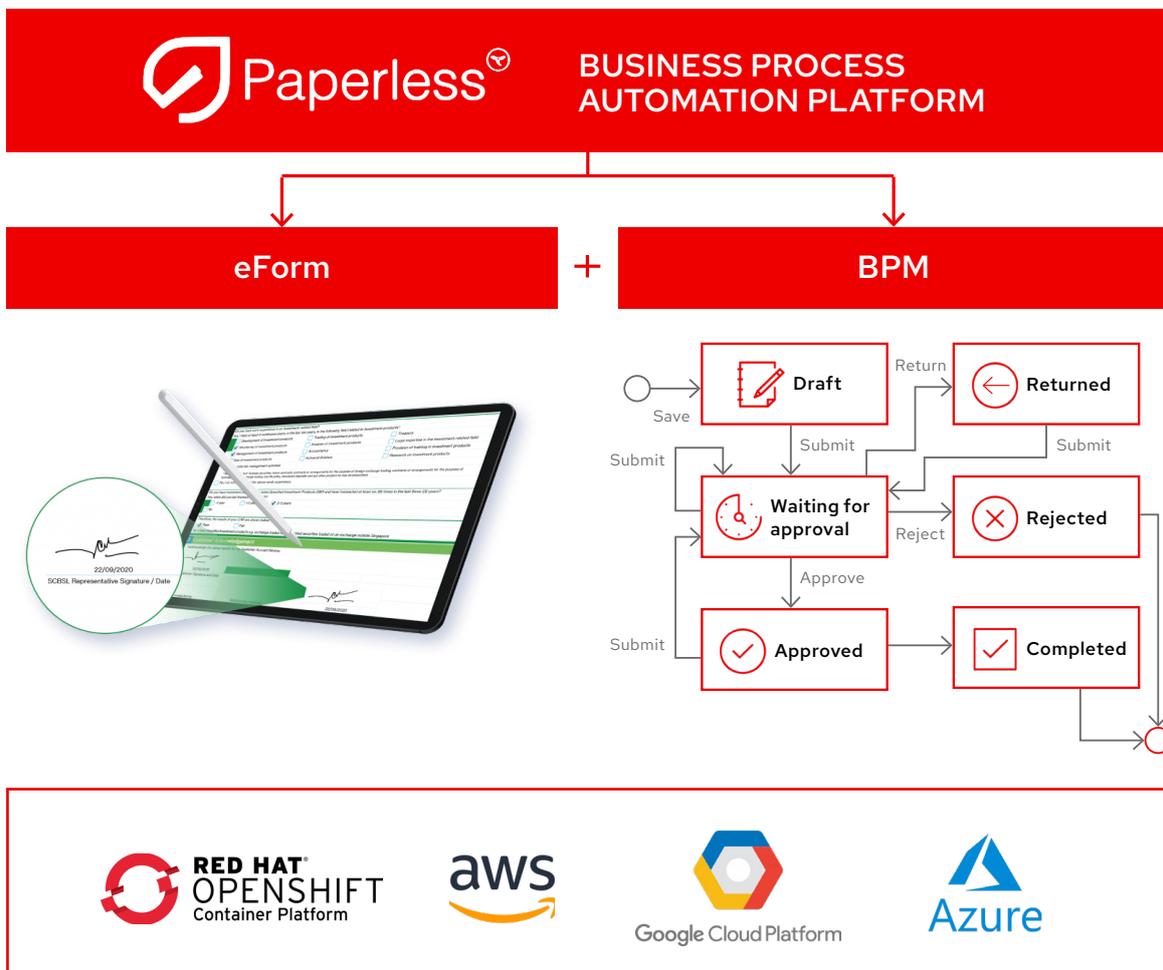

- **Reduces operating costs** – UNIT's paperless solution eliminates the costs associated with ink, paper and storage costs.
- **Improves employee experience** – when staff don't need to complete manual data entry, they can work more efficiently, and focus on more valuable work.
- **Supports end-to-end transactions** – includes digital signature functionality, so customers receive a seamless experience from start to finish.

With UNIT Paperless, organizations can digitalize a wide range of 'at-the-counter' transactions, including for import-export, loan approvals, disbursement, internal approval, budget management, centralized procurement, asset management and many more.

Key features

- **Support for multiple platforms and devices** – including Windows, Mac and Linux.
- **Easy to use** – forms are simple and intuitive for both customers and employees.
- **Continuous vulnerability scans** – to ensure the highest levels of security and compliance.
- **Customisable dashboard** – with statistics and insights, including pending tasks from various departments.
- **Fully containerised** – so it can scale rapidly according to your requirements.

Why partner with UNIT Technology?

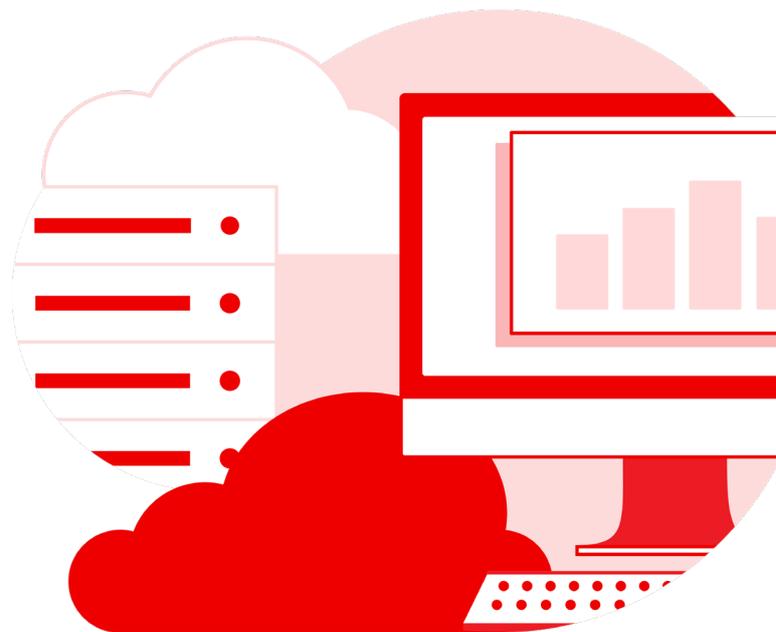

UNIT Technology is an experienced solutions and services provider, specializing in finance, banking, insurance and enterprise. We work in close collaboration with our partners to understand their unique needs, creating customized solutions that drive competitive advantage and support end-to-end digital transformation.

UNIT Technologies is proud to be a Red Hat Advanced Partner.

Built on:

- Red Hat OpenShift
- Red Hat Enterprise Linux
- Red Hat Runtime

UNIT Paperless recently helped a tier 1 bank reduce its form-processing time by 80%, saving the bank considerable costs.
