

5 things to know about building and certifying software on Red Hat Enterprise Linux

Let's build better, together.

Create and certify your software on Red Hat® platforms to offer your business and your customers more flexibility, scalability, and freedom from vendor lock-in.

One: The basics

Linux® is one of the world's most dominant operating systems with widespread adoption across industries and emerging technologies.¹

Download the **basic** and **advanced** Linux commands cheat sheets to get started with Linux.

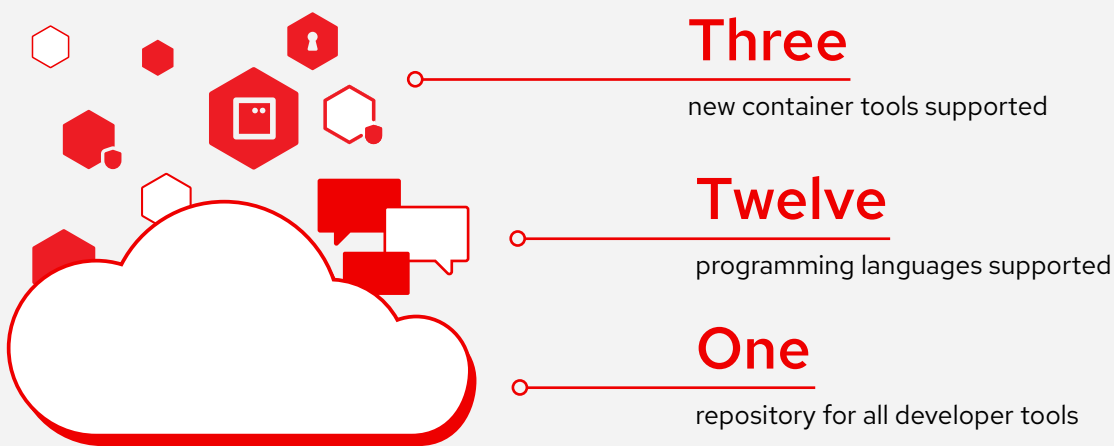

Two: The proof points

Red Hat Enterprise Linux is the leading choice for paid Linux distributions.³ Our customers tell us they are adopting Red Hat Enterprise Linux 8 as a production-grade platform to innovate at scale.

Three: The tools

Red Hat Enterprise Linux 8 adds more developer-focused features and tools, giving you more choice and flexibility to work how you work best.

Visit the **Red Hat Enterprise Linux 8 page** at Red Hat Developer to learn more.

Four: The certification

Customers choose certified solutions for increased interoperability, security, and support. Certifying your products with Red Hat Enterprise Linux 8 can deliver measurable business value.

Visit **Red Hat Partner Connect** and read the **certification guide** to learn more about certifying.

Five: The starting points

No matter where you are in your partnership with Red Hat, you can begin certifying your apps today.

Visit the **Red Hat Enterprise Linux 8 developer page** to learn more.

Promote your products with Red Hat certifications.

It's easier than ever to develop and certify your applications with Red Hat Enterprise Linux 8.
